Tarun

Mobile & Full-Stack Engineer | Flutter, iOS & Web

New Delhi, India | itstarun1994@gmail.com | +91 95827 55941 | linkedin.com/in/iamtarun | github.com/itstarun | itstarun.fyi

PROFESSIONAL SUMMARY

Mobile & Full-Stack Engineer with **8+ years shipping production mobile and web systems**, including 3+ years in Flutter & Dart alongside modern TypeScript/React/Next.js stacks. Proven track record leading end-to-end delivery—from architecture, REST/real-time APIs, and server-driven UI to CI/CD, App Store, Google Play, and web releases. Deep native iOS background (Swift, UIKit, SwiftUI, WidgetKit) combined with cross-platform and full-stack web expertise to build scalable, 99%+ crash-free products.

CORE SKILLS

Mobile Engineering: Flutter, Dart, Swift, Objective-C, UIKit, SwiftUI, WidgetKit, Live Activities, MethodChannel, CarPlay
Full-Stack & Web: Next.js, React, TypeScript, Node.js, Tailwind CSS, PostgreSQL, Prisma, Convex, REST APIs, Web3/Polkadot
Architecture & State: Clean Architecture, MVVM, VIPER, Modular Design, Server-Driven UI (SDUI), Provider, TanStack Query
Backend & Data: RESTful APIs, WebSockets, Real-time updates, Push Notifications (OneSignal, FCM), Redis, JSON Serialization
Delivery & DevOps: CI/CD, App Store Connect, Google Play Console, Git, GitLab, Linear, Postman, Sentry, PostHog, Unit/Widget Testing

PROFESSIONAL EXPERIENCE

Mobile & Full-Stack Engineer, Chargespot — **Jul 2023 - Present**

- Architecting the Chargespot EV charging platform in Flutter, maintaining a unified production codebase for iOS & Android.
- Engineered native iOS Live Activities & interactive home-screen widgets via WidgetKit, interfaced to Flutter over MethodChannels.
- Adding Apple CarPlay and Android Auto support for in-car EV charger discovery, route navigation, and session control.
- Connected REST APIs for real-time station availability, live telemetry, and payments; built server-driven UI (SDUI) for zero-release updates.
- Integrated OneSignal (push), PostHog (product analytics), and Sentry (crash reporting); manage releases maintaining 99%+ crash-free rate.

Software Engineer - Flutter, Droidsize Technologies — **Oct 2022 - Jul 2023**

- Engineered reusable Flutter UI component libraries that supported server-driven dynamic UI layouts and remote content delivery.
- Delivered production screens and integrated backend REST APIs with resilient error handling and caching.
- Collaborated in sprint planning, architecture reviews, and delivery using Git, GitLab, Jira, and Linear.

iOS Developer, EyeMyEye — **Aug 2021 - Oct 2022**

- Built the flagship EyeMyEye iOS e-commerce app from scratch, establishing a modular VIPER architecture.
- Shipped multiple production App Store releases while maintaining a 99%+ crash-free user session benchmark.
- Worked closely with PM, UX, and Android engineers to maintain strict design fidelity, API parity, and release velocity.

Lead iOS Engineer (promoted from iOS Developer), DailyObjects — **Jul 2019 - Aug 2021**

- Promoted to Lead iOS Engineer in Jan 2020; spearheaded end-to-end revamp of the DailyObjects iOS app (4.7 stars on App Store).
- Implemented personalized API-driven discovery feeds, dynamic dark mode, and rich interactive push notifications via FCM.
- Standardized Coordinator pattern with protocol-oriented networking; grew unit & UI test coverage to 40%+ and mentored team.

iOS Developer, StartxLabs — **May 2018 - Jun 2019**

- Built modular Swift components, in-app rating modules, and social sharing features across client applications.
- Mentored junior developers on iOS foundations and facilitated technical handoffs to incoming project leads.

FEATURED PROJECTS & APPS

- **Chargespot** (Flutter, iOS, Android): EV charging app with Live Activities & telemetry | chargespot.app | App Store | Play Store
- **Repo Press** (Next.js, TypeScript, Convex, GitHub API): Git-native MDX block editor with zero vendor lock-in | repo-press.vercel.app
- **Domain Collective** (Next.js 15, PostgreSQL, Prisma, BullMQ, Redis): Unified multi-registrar domain platform | collective.domains
- **DailyObjects & EyeMyEye** (iOS, Swift, UIKit): High-scale e-commerce apps (4.7-star rating) | App Store | Play Store

EDUCATION

Bachelor of Computer Applications (BCA), Punjab Technical University — **2014 - 2017**
DOEACC 'A' Level Certificate (Advanced Diploma in Computer Applications) — **2018**
